**William J. Lyons, Jr., Secretary  
California Department of Food and Agriculture**

**And**

**The Honorable Board of Supervisors of Riverside County**

**Bob Buster, District I**

**John Tavalione, District II  
Roy Wilson, District IV**

**Jim Venable, District III  
Tom Mullen, District V**

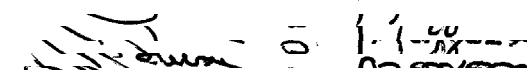

I am pleased to submit the 2001 Agricultural Production Report for the acreage, yield and gross valuation of agricultural crops and livestock in Riverside County.

This year's Agricultural Production Report represents a total gross valuation of \$1,124,908,400, which is an increase of \$76,346,800 over the 2000 gross value. The gross value for agricultural crops was \$757,324,900, an increase of \$75,756,100 from the previous year. The value of livestock and poultry production was \$367,583,500, an increase of \$590,700 over the 2000 value.

It must be emphasized that this report reflects a gross return and in no way represents a measure of profit or loss to the producer. Leading agricultural economists agree that every dollar received by farmers in Riverside County in 2001, has the financial impact of three times that amount. Therefore, \$1,124,908,400 becomes over \$3,374,725,000 revenue generated into the local economy.

I wish to express my sincere appreciation to the producers, processors and agencies who have provided the information necessary for the compilation of this report. I would also like to express my gratitude to all the members off my staff, particularly Dustin Wiley, for his dedicated contribution toward the preparation of this report.

Respectfully submitted,

  
James O. Wallace  
Agricultural Commissioner  
Director of Weights & Measures

Mosquitoes	<u>Aedes vexans</u> <u>Culex quinquefasciatus</u> <u>Bacillus thur. israelensis</u> <u>Culex tarsalis</u> <u>Psorophora columbiae</u> <u>Gambusia affinis</u>
Persea mite	<u>Galendromus annectens</u> <u>Galendromus helveolus</u> <u>Galendromus pilosus</u>
Two-spotted spider mite	<u>Phytoseiulus persimilis</u> <u>Galendromus occidentalis</u>
Vine mealybug	<u>Cryptolaemus montrouzieri</u>
Western grapeleaf skeletonizer	<u>Ametadoria harrisinae</u> <u>Apanteles harrisinae</u>
Woolly whitefly	<u>Amitus spiniferus</u> <u>Cales noacki</u>
Brown garden snail	<u>Rumina decollata</u>

## SUPPRESSION OF PLANT DISEASES

Curlytop virus reduced by controlling Beet leafhopper (insect) on Russian thistle (weed). Cultural and biological control of the Silverleaf whitefly (insect) to suppress plant disorders and fungi on numerous host crops planted throughout the desert regions of Riverside County.

## OTHER

Enforcement of County Ordinances to control Lettuce Mosaic Virus disease, soil (dust) erosion and illegal soil grading, land application of agricultural manure & sewage sludge, and cotton plowdown.
